# CHOCKS, STANDS & TIE DOWNS

**NO DRILLING!  
NO HARDWARE!  
NO MOUNTING!**

## EZ CHOCK™ U.S. Patent D547,712 & 7,044,309

The challenge to all truck, trailer & toy hauler owners is to find a simple low cost solution to chocking motorcycles without the hassle of mounting hardware. With the EZ Chock, the hassle of drilling or mounting any hardware for wheel chocks is a thing of the past!

The EZ Chock design allows the use of the same chock in the truck, trailer or toy hauler without additional mounting hardware. A chock that goes where your bike goes... Not the other way around!

It's patented plate & tab strapping design secures your bike in place without the traditional mounting hardware that all other chocks require.

935 | 3-1/2" for Cruisers Dirt Bikes with Narrow Front Tires (ea) | \$49.99

Note: We suggest P/N 935 for motorcycles with 80/90, 90/90, or MH/90 front tires.

# #1 ENDORSED DEER ALERT IN AMERICA

## V-120 & V-120C HORNET®

ELECTRONIC DEER AVOIDANCE SYSTEM

Deer are the number one animal causing human deaths in this country. The Hornet has proven to be the only device to effectively deter deer accidents. There are tens of thousands of Hornets in daily use with millions of proven miles. Regardless of speed, it produces a sound pressure of 120 db, & under most circumstances is very resistant to contamination. Regular inspection & cleaning is recommended.

Proper placement is essential for maximum performance. Detailed instructions make for easy & effective installation. The Hornet includes various universal mounting brackets, basic hardware & a switch. A separate motorcycle wiring kit is available & includes a harness & switch specifically designed for use on a motorcycle; while not required, it will make the installation much neater. Our P-Clamps work great on many motorcycles to assist in mounting to frames or engine guards.

Universal fit on 12-volt motorcycles
