### TOOLS SUGGESTED

Standard or Phillips Screwdriver, 5/64" hex key

### PROCEDURE AVERAGE TIME: 15 MINUTES

**STEP 1** With a Phillips or standard screwdriver, remove the screws and original lenses from the Mini Bullet Lights.

**STEP 2** Remove the screws from the new amber lens and bezel assemblies.

**STEP 3** Choose the preferred lens color. Remember, the color of the lens does not change the color of light emitted. If the L.E.D.s illuminate amber, changing to red lenses will have no effect.

**STEP 4** Slip the selected lens and bezel assembly into place on the light body and align the screw hole in the bezel with the slot in the lens and the hole in the body. Install the screw and tighten with a 5/64" hex key. Repeat this procedure on the other Mini Bullet.
