304004	1 Installation Instructions

### TOOLS SUGGESTED

Set of Standard and Metric Combination Wrenches and a Set of Standard and Metric Allen Wrenches and a Factory Service Manual for wiring reference.

### NOTE

We recommend using Kuryakyn Part No. 2328, Universal Wiring and Relay Kit, to manually operate the running lights. It is important to use Loctite on all hardware when installing new parts.

### PROCEDURE

- STEP 1** Remove the two Phillips head screws on the sides of the headlight; unplug and remove the headlight bulb and bezel.
- STEP 2** Remove the pull-off cover on the O.E.M. turn signal bar.
- STEP 3** Disconnect O.E.M. turn signals. (Inside headlight)
- STEP 4** Remove the lower adjustment bolt inside the headlight.
- STEP 5** Remove the O.E.M. turn signal light bar by removing the two bolts and set these aside.
- STEP 6** Install the new Light Bar mount and head light mount using the O.E.M. hardware.
- STEP 7** Mount the new Light Bar on to the mounting plate using the two 1/4"-20 X .40" Button Head Cap Screws supplied with the light bar.
- STEP 8** Connect the turn signal wires to the corresponding O.E.M. wires inside of the headlight. (Refer to Factory Service Manual.) We recommend connecting both of the power leads to from the driving lights to Kuryakyn Part No. 2328, Universal Wiring and Relay Kit, or an equal quality relay switch.

### WIRING COLOR CODES AND INFORMATION

#### L.E.D. Auxiliary Running Lights and Turn Signals

COLOR	FUNCTION
Red	"Low" running light
White	"High" turn signal
Black	Ground

#### Silver Bullet Driving Lights

These halogen lights are grounded by their connection to the chassis. The single black wire from each light is the power wire.

- STEP 9** Test for function of ALL the lights before re-assembling the headlight and bezel. Reassemble the headlight when all lights are functioning properly.
