

CUSTOM BRAKE PEDAL

4033

FITS: GL1800

PART#	INCLUDED
404033	1 Brake Lever (Arm) – Chrome
404033RS	2 Rubber Pad – Rectangular
404033RC	1 Rubber Pad – Radiused
400078	1 Anti-seize
304033	1 Instructions

TOOLS SUGGESTED

12mm Wrench, Large flat tip screwdriver

PROCEDURE AVERAGE TIME: 30 MINUTES

- STEP 1** Loosen the pinch bolt on the stock brake lever.
- STEP 2** Remove the plastic side cover located above the drivers footpeg mount.
- STEP 3** Remove the stock brake lever from its splined mount. If this is difficult, it may help to carefully wedge a screwdriver in the pinch slot where the pinch bolt was removed.
- STEP 4** The new lever should be installed in the same orientation as the original. Again, it may ease installation to carefully wedge a screwdriver into the pinch slot as shown in PIC.1. It may be necessary to reach in behind the splined brake control shaft with your finger, or a long screwdriver and hold the shaft in place while installing the new brake lever.
- STEP 5** Sit on the bike and confirm that the new lever is positioned to your liking. If not, remove it and rotate it on the splines by one or two teeth and reinstall. Secure the lever in place with the stock pinch bolt. (Anti-seize should be applied to these threads.) Replace the plastic side cover.

Ride On!
