**STEP 2** Insert one of either the Long or Short Inserts (depending on your application - PIC 1) in to the Ergo/Ergo II arm. Make sure that the insert is installed with the larger flange facing outward.

**NOTE** The Inserts are tapered to match the arm slots. Look carefully to determine the slight taper of the long inserts especially.

**STEP 3** Install one LED Accent in to the Insert (PIC 2) that was installed in Step 2. Insert the wires first and push the Accent in to the Insert from the front side of the Ergo arm.

**STEP 4** Locate a keyed 12V power source and connect the red wire from the LED Accent using the supplied connectors.

**STEP 5** Locate a suitable electrical ground and connect the black wire from the LED Accent using the supplied connectors.

**ATTENTION!** Kuryakyn recommends the use of dielectric grease on electrical connections.

**STEP 6** Hide all wires away from heat or pinch points.

**ATTENTION!** Secure all wiring away from any moving parts, pinch points or extreme heat. Kuryakyn WILL NOT issue a warranty on any electrical component that fails due to pinched, crimped, broken, abraded, melted or frayed wires.

**STEP 7** Repeat Steps 2-6 for the opposite side.

**STEP 8** Reassemble any panels or hardware that may have been removed.

**ATTENTION!** It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not issue a warranty on components lost due to improper installation. Periodic maintenance may be required.

*Ride On!*
