201150	2 10–24 X 5/8" Button Socket Cap Screw – Chrome
201151	2 10–24 X 3/4" Button Socket Cap Screw – Chrome
404215S	1 Spring for Flag Mount
304215	1 Instruction Sheet

TOOLS SUGGESTED

Set of Standard Allen Wrenches

PROCEDURE

STEP 1 Remove the two fasteners marked as "C" in PIC.1 using a 1/8" Allen wrench. The two pieces of the clamp assembly will then separate.

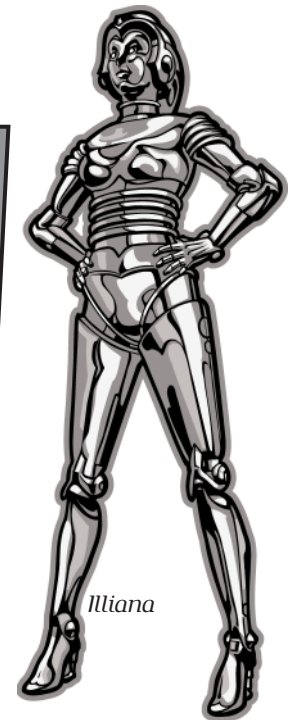

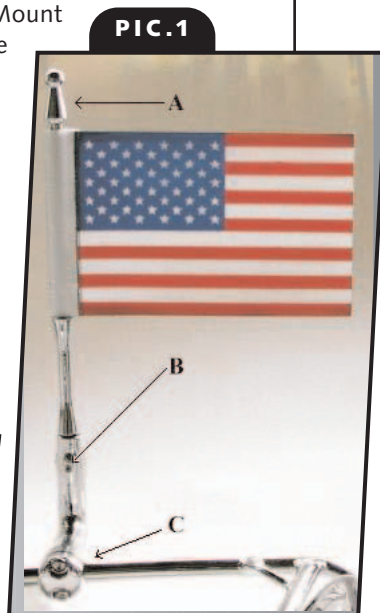

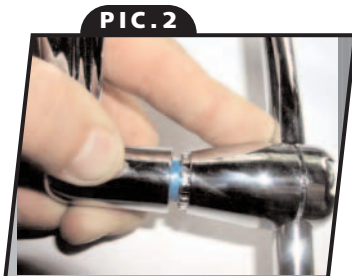

STEP 2 Choose the 1/2" round bar where the Flag Holder will be mounted. Place one half of the clamp on each side of the round bar with the main Mount Clamp and Rod/Pole toward the outside of the bike. Reinstall the fasteners you removed in the previous step and tighten fully.

STEP 3 Ensure the Rod/Pole Flag Holder is secured to the Flag Mount Arm by making sure the three set screws marked as "B" in PIC.1 are snug using a 3/32" Allen wrench.

STEP 4 To remove, install or replace the flag, turn the Top Tip marked as "A" in PIC.1 counter clockwise until it threads off of the Rod/Pole. When finished, reinstall and tighten the Top Tip snugly.

POINT OF ADJUSTMENT

You can adjust the angle of the Flag Holder by pulling outward on the main Mount Clamp and Rod/Pole assembly and rotating to the desired angle. See PIC.2. When the desired angle is achieved, make sure the Mount Clamp and Rod/Pole assembly is securely seated back into the interlock notches.
