TOOLS SUGGESTED

9/16" Socket Wrench or Combination Wrench

NOTE

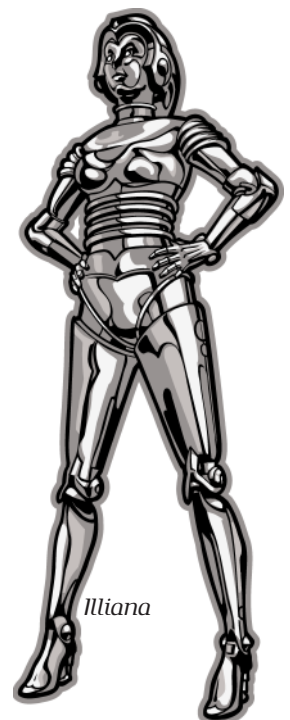

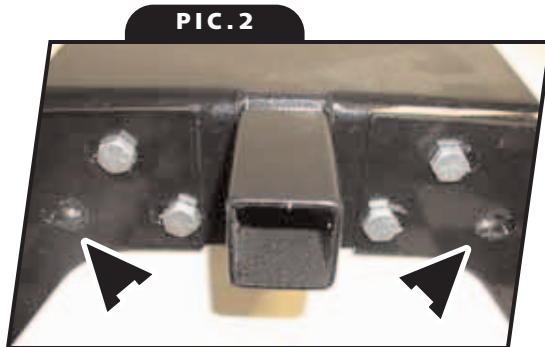

Some of these pictures were taken with the hitch assembly removed from the motorcycle to show a better view of the related components and fasteners. Actual installation will be performed with the hitch in place on the motorcycle.

PROCEDURE

STEP 1 Remove the five button head bolts that secure the center rear panel to the motorcycle. There is one fastener in each corner (see PIC.1) and one behind the license plate (not shown).

STEP 2 See PIC.2. Remove the two outer most mounting bolts used to join the hitch trunion bars to the bottom of the hitch mounting plate.

**STEP 3** Using the fasteners removed in Step 2, affix the mud flap mounting plate to the trailer hitch as shown in [PIC.3](#). It only goes on one way.

**STEP 4** Continue the installation following the instructions and using the fasteners included with the "Debris Modulator" mud flap, P/N 7251. [PIC.4](#) and [PIC.5](#) show the relationship of the mud flap to the hitch receiver when the installation is complete.

*Ride On!*
