ATTENTION! This indication alerts you to the fact that ignoring the contents described herein may negatively affect product performance and functionality.

STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

STEP 2 Thoroughly clean the backside of the tank (area in front of the seat) with mild soap and water. Surface must be clean for the tank pad to adhere properly.

ATTENTION! Ensure the area of installation is free of grease, oil, dirt or other debris to ensure proper adhesion. Kuryakyn WILL NOT issue a warranty on any parts lost due to improper installation.

STEP 3 Detach the adhesive tank pad from the backing card.

STEP 4 Position the tank pad on the tank, press slightly in place. Avoid touching the adhesive backing surface with your fingers to prevent the adhesive from losing its full bonding strength.

STEP 5 Firmly press down on the tank pad. Press very firmly around the edges of the pad to ensure full contact between both surfaces.

ATTENTION! The adhesive will not bond correctly if applied at temperatures less than 50°F. Do not attempt this installation in temperatures less than 50°F.
